

ALL OVER ITALY IN AN INSTANT.

WE CAN.

 **iKING**  
we connect

FOR OVER 20 YEARS OUR MICROWAVE RADIO TECHNOLOGY HAS BEEN AT THE SIDE OF THE OPERATORS TO CONNECT EVERY PLACE WITH MAXIMUM PERFORMANCE.

Viking Italy is a telecommunications operator with entirely Italian capital that provides Carrier-Grade dedicated point-to-point links for large TLC operators on proprietary networks throughout the national territory.

To connect any site, wherever it is, Viking provides pure Layer 2 capacity Ethernet circuits, Full Transparent and Protocol Transparent. All the last mile stretches are on point-to-point Microwave Radio Links and on dedicated Optical Fiber, to ensure maximum security and excellent performance.

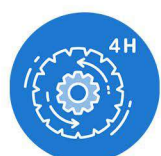

POINT-TO-POINT DEDICATED LINKS.

ACTIVATION EVEN IN DIGITAL DIVIDE AREAS.

COMPLIANCE WITH MEF CE 2.0 STANDARDS.

SLA 4 - 4H RECOVERY TIME (ALSO H24/7).

PROACTIVE MONITORING 24/7.

INTERNAL STAFF ONLY.

AVERAGE ACTIVATION TIMES 45 DAYS.

PROPRIETARY INFRASTRUCTURE.

## L2 LINKS FOR LAST MILE STRETCH

FULL TRANSPARENT AND PROTOCOL TRANSPARENT

### Net:Lan

ON P-T-P MICROWAVE LINK.

MGB = 100%  
Simmetry = 100%  
Availability > 99,95%

### Fiber:Lan

ON FIBER OPTIC.

MGB = 100%  
Simmetry = 100%  
Availability = 99%-99,90%

## DIRECT INTERNET ACCESS

DEDICATED INTERNET CONNECTIVITY SERVICES

### Hiper:Net

ON P-T-P MICROWAVE LINK.

MGB = 100%  
Simmetry = 100%  
Availability > 99,95%

### Fiber:Go

ON FIBER OPTIC.

MGB = 100%  
Simmetry = 100%  
Availability = 99%-99,90%

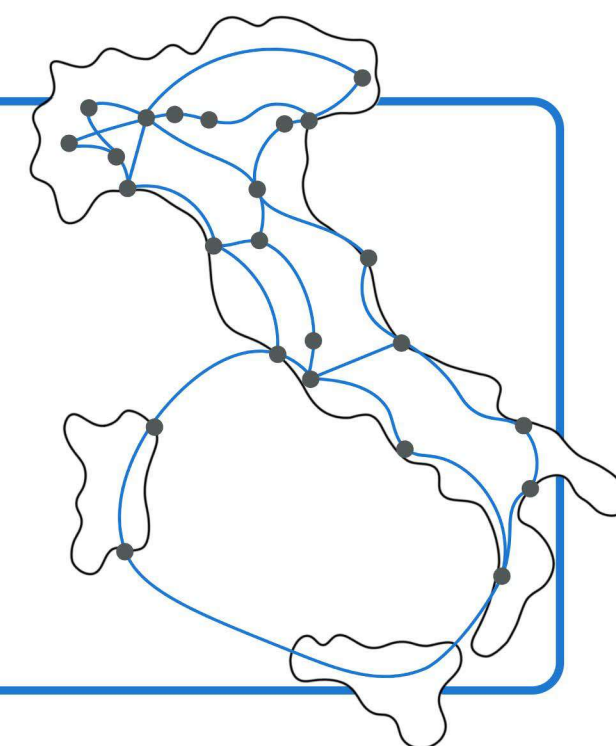

### Top:Net

FIBER OPTIC+MICROWAVE LINK.

MGB = 100%  
Simmetry = 100%  
Availability = 99,99%

### OUR BACKBONE IN ITALY.

An ultra-broadband proprietary infrastructure that we control directly, without sharing with other providers, managed solely by internal staff. Our infrastructure is designed to guarantee a level of excellence throughout Italy, with total redundancy and increasingly innovative technologies. An exclusive data highway, where those who do not want the traffic nor the incidents typical of a shared access network can travel in total tranquillity. This is the assurance of security.

## VIKING OFFERS TELECOMMUNICATION SERVICES ON ITS OWN NETWORKS, BOTH OVER DEDICATED OPTICAL FIBER AND OVER POINT-TO-POINT MICROWAVE CIRCUITS IN CARRIER GRADE.

For over 20 years, Viking has been guaranteeing excellent quality connections throughout the country, without the involvement of third parties or external call centers.

This allows for control by highly qualified internal staff at all stages of planning, installation, monitoring, maintenance and technical support.

The continuous monitoring of the infrastructure allows us to always guarantee the operation and performance of the corporate network in any situation.
